

Driver Role

As the Driver, your role is to navigate the rainforest terrain with the driving base and controller, coordinating with teammates to collect and transport keystone species, resources, and complete missions. Your driving helps set the pace for your team's success.

Driver Tool

A driving base with a dual motor and controller, intended to navigate the game field.

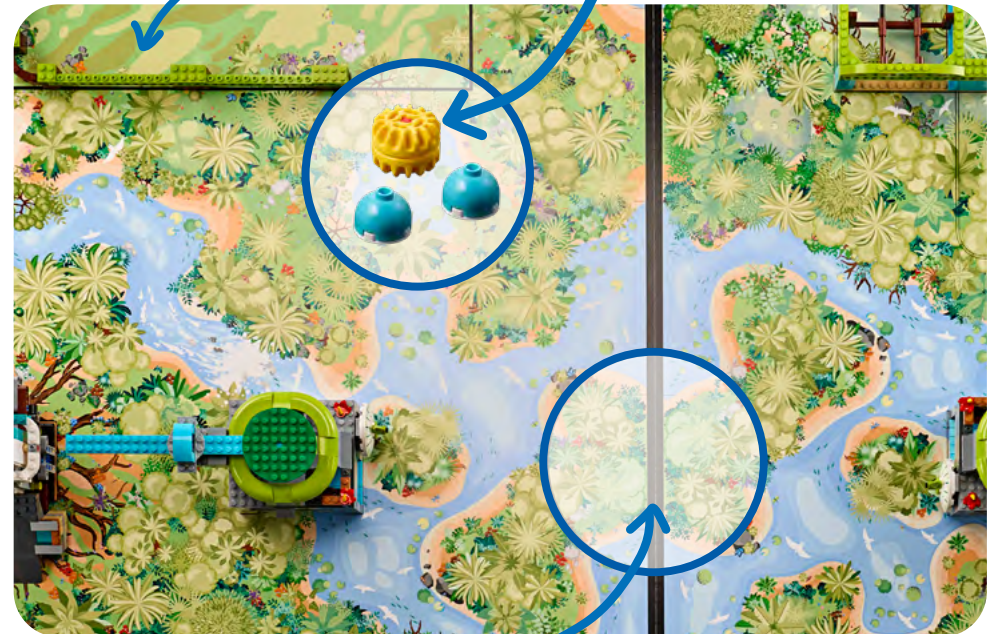

Guided Mission:

Collect the keystone species and resource tokens from outside the Technician Area and deliver them to the central haven. Each delivery lays the foundation for building a balanced ecosystem.

(See Mission 05)

Technician Area

Keystone Species & Resource Tokens

Central Haven

- Keystone species and resources resting completely in the central haven: **5 points each**

Instructions:

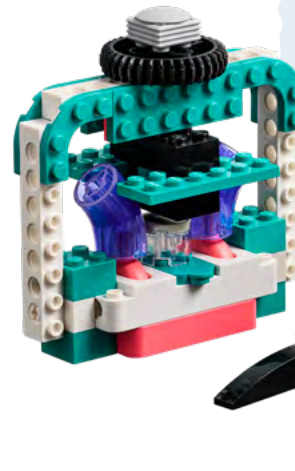

1. Pair the dual motor and controller.
2. Place the driving base completely within the Technician Area, aimed toward the keystone species and resource tokens.
3. Drive forward to collect tokens with the scoop on the front of the driving base.
4. Continue driving and deliver the tokens to the central haven.
5. Reverse the driving base back to the Technician Area to sharpen your navigation skills and prepare for your next mission.

Tip:

Smooth, steady driving beats speed. A well-controlled approach makes it easier to carry tokens without losing them along the way.
