

Operator Role

As the Operator, your role is to restore ecological balance by sending resources into the grand tree using a mechanical tool. Your deliveries help the tree spread life through its roots, supporting countless species in the rainforest and strengthening the surrounding ecosystem.

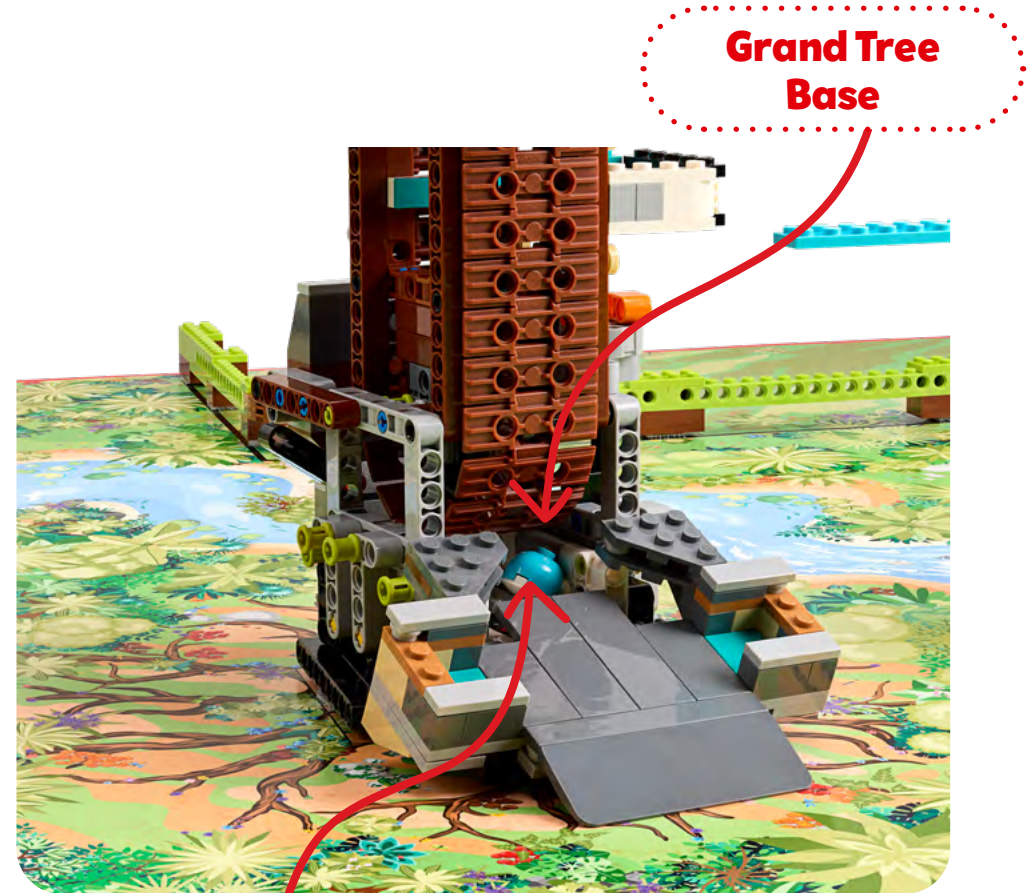

Operator Tool:

A mechanical build intended to send tokens to other parts of the field.

Guided Mission:

Using your tool, send resources into the grand tree base. Each resource delivered to the tree can then be cycled to bring vitality back to the rainforest.

(See Mission 02)

Resource

**Grand Tree
Base**

◦ Resources in the grand tree base: **5 points each**

Instructions:

1. Place the tool on the mat, inside the Operator Area.
2. Load one resource token into the track at the base of the tool and aim at the grand tree base.
3. Operate the tool using the knob on the side:
 - Turn knob backward to build up power.
 - Spin the knob forward to launch the resource.
4. Observe the outcome of your launch. Repeat steps 1-3, adjusting your aim and power until the resource successfully lands in the base.

Tip:

Adjust your aim and power for smooth, consistent delivery. Steady, accurate shots are often more effective than rapid attempts.
