

Specialist Role

As the Specialist, your role is to operate the grand tree, the rainforest's central nerve. By controlling the flow of resources and rotating the tree to align with different players, you thread the ecosystem together, helping maintain balance and maximizing scoring opportunities for your team.

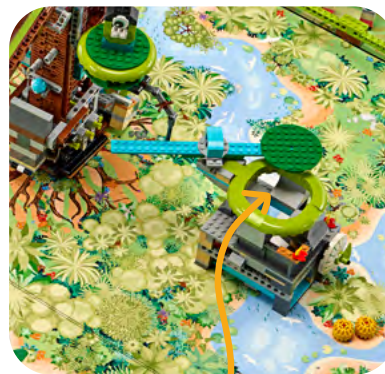

Specialist Tool:

A controller intended to operate the dual motor in the grand tree.

Guided Mission:

Use the controller to cycle the pre-loaded resource up to the canopy chamber, then rotate the tree to reveal the cave waterfall entrance.

(See Mission 02)

Cave Waterfall Entrance

Canopy Chamber

Branch

Controller

Resource

- Resource is in the canopy chamber: **10 points**
- Cave waterfall entrance is revealed

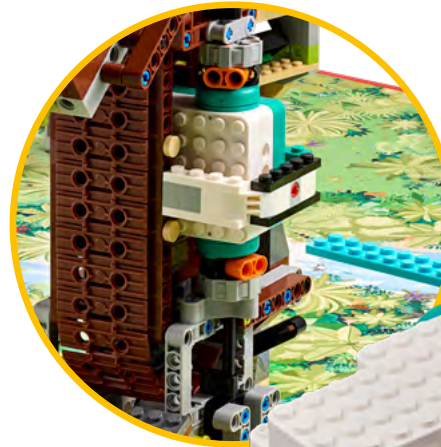

Instructions:

1. Place the dual motor in the grand tree using the instructions in Book E1.
2. Pair the dual motor and controller.
3. Use your controller to cycle the resource from the grand tree base until it lands in the canopy chamber.
4. Next, use the controller to rotate the grand tree until the branch reveals the cave waterfall entrance.

Tip:

Adjust your design for stability and accuracy. A well-aimed shot can be more valuable than rapid fire.
